

ADAMS HLS-2-LP (GYPSUM/LIME/FERTILIZER)

This is the same unit as our best selling combo unit; however, this spreader is designed with a special low profile axle and smaller tires, which lowers the maximum height of the unit to 56" off of the ground. The Adams HLS-2-LP is specifically designed for orchards and other application needs that require a low-profile design.

LOW PROFILE COMBO SPREADER

(GYPSUM/LIME/FERTILIZER)
