

HIGHWAY EQUIPMENT SPREADERS

Highway Equipment L4000 G4

The New Leader® L4000 G4 is a culmination of the best of the best! The design of the L4000 G4 provides modular hydraulic packages to suit your spreading needs, plus the ability to add a second, third or fourth bin at any time.

The customizable L4000 G4 is designed to meet your needs. Choose between a 13' or 14' body length; painted 409 stainless steel or non-painted 304 stainless steel, and a #4 belt-over-chain or a #3 pintle chain - all depending on your capacity and spreading needs. You can further customize your until with either standard hydraulics or high performance hydraulics and add a 5' or 7' Multiplier for spreading up to three variable rate applications in one pass. The L4000 G4 standard body width is 102" with 6" side extensions, and includes a bolted-in rear endgate for greater structural integrity.
