Fertilizer & Spray Application Equipment

# FIBERGLASS TANKS

- Designed to eliminate the effects of fertilizer & chemical corrosion, providing long term performance.
- Fiberglass tanks do not rust like mild steel tanks
- Designed to store your specific product and storage environment
- Seamless one piece construction
- Up to 42,000 gallon storage capacity
- Available in various shapes including flat bottom, horizontal or vertical leg tanks, sloped bottom and cone shaped construction.

Custom options available for your specific application including:

- Manways to provide easy access to the interior of the tank
- Sight gauges to monitor inventory levels
- Lifting lugs for unloading tanks & positioning the tank on the ground
- Threaded or flanged molded couplings
- Gel coated exterior for maximum UV protection
- Vents sized to match the discharge fittings
- Color options of white or grey
- Seismic capabilities

**Fiberglass cost less than stainless steel tanks!**
